Motivation and Goal

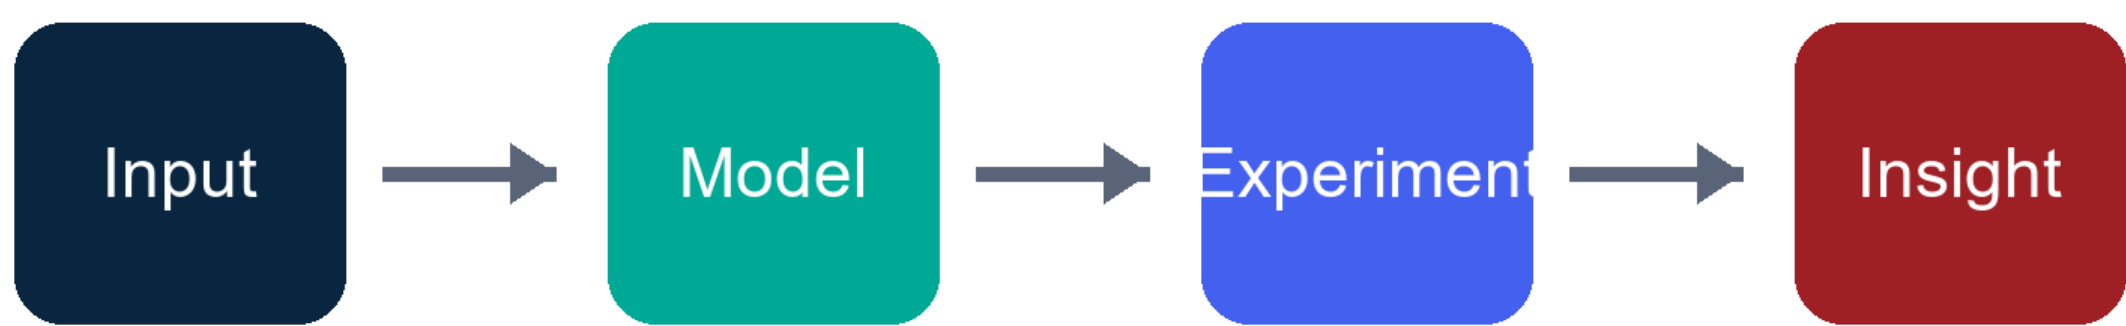

Concise motivation, research gap, and hypothesis. Keep prose short and use whitespace to emphasize the central message.

Theory and Formula

Key equation space: $y = f(x; \theta)$, assumptions, symbol definitions, and how measured variables connect to the model.

Model and Method

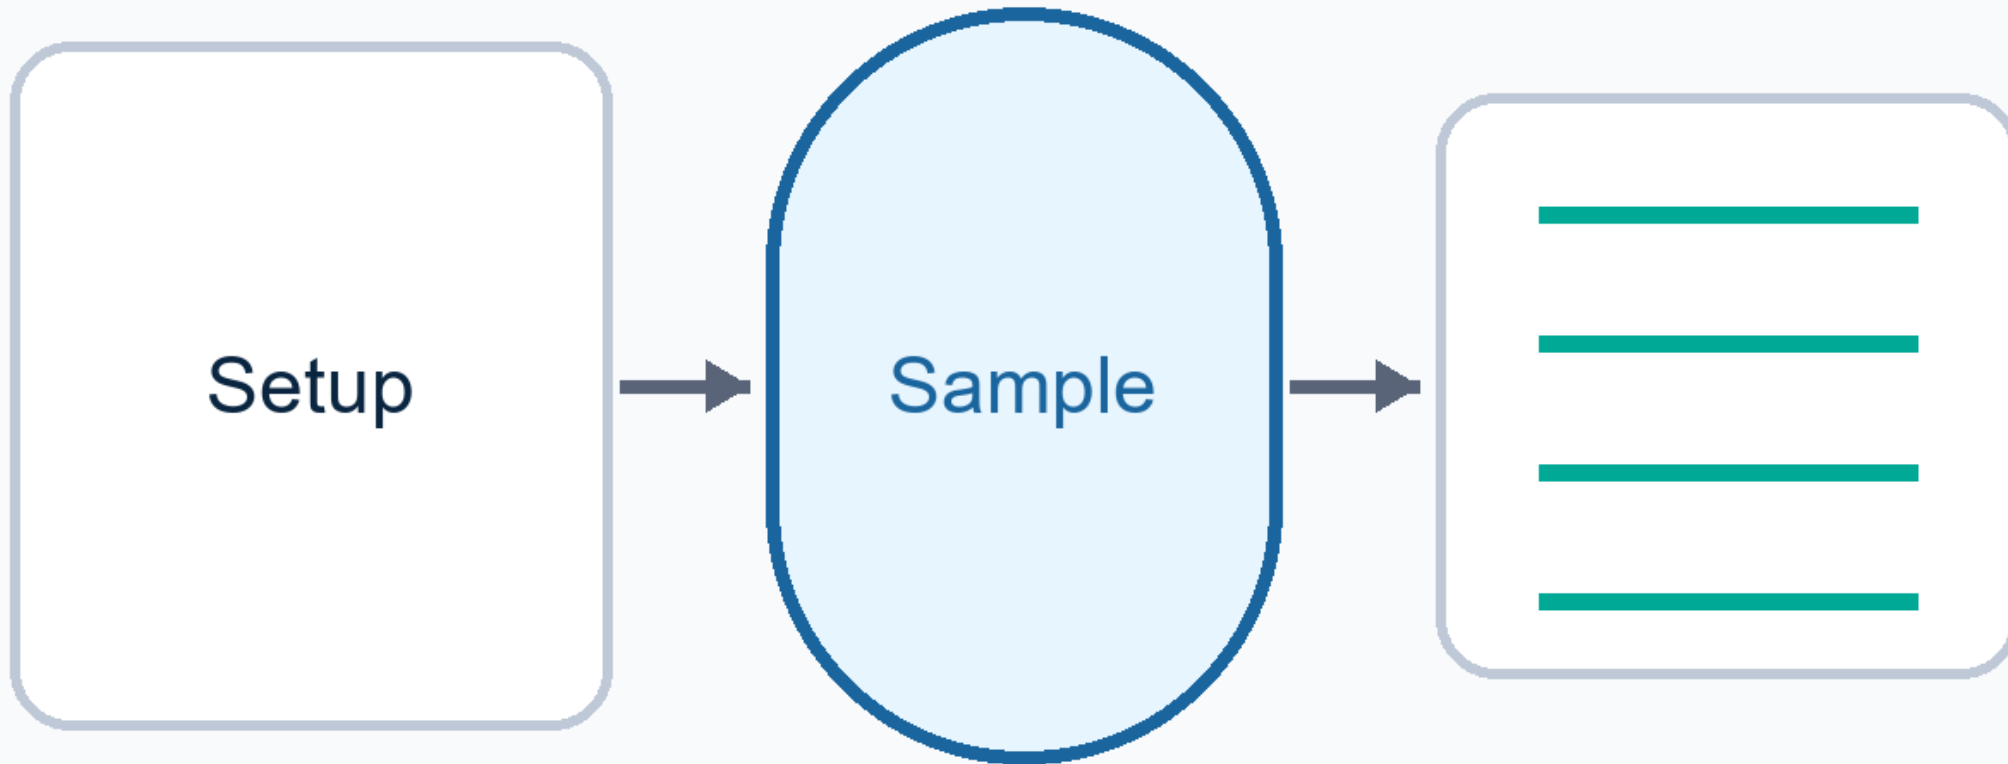

Workflow Flowchart

Reserved visual panel for pipeline, algorithm, or system architecture

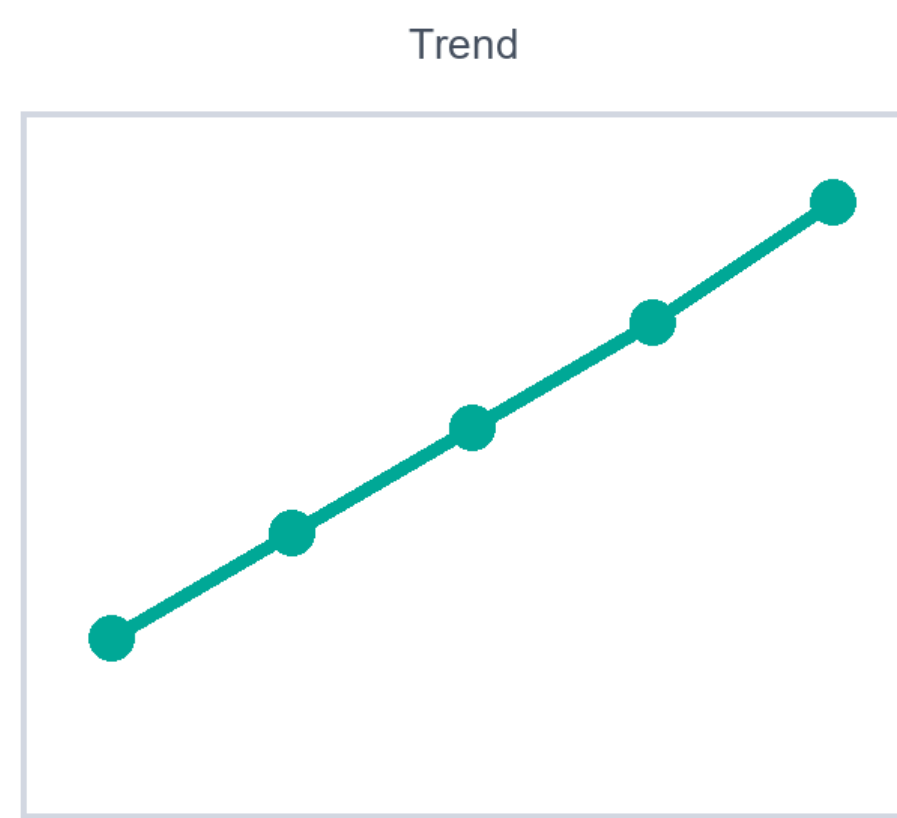

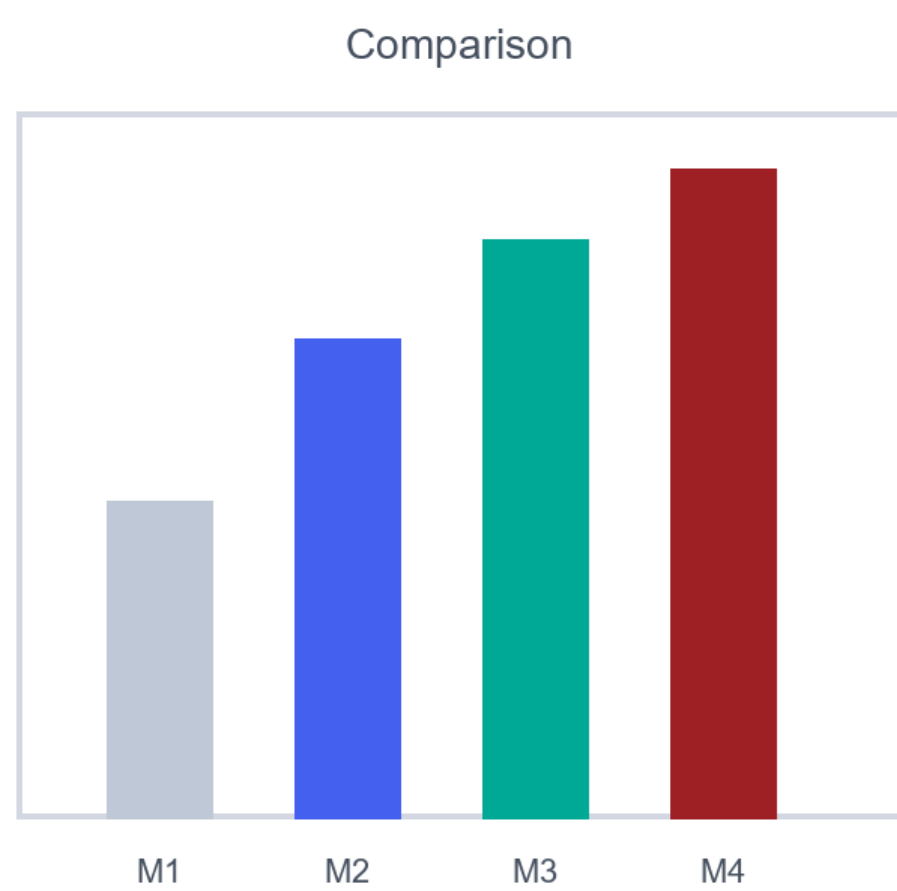

Experimental Workflow

Experimental Schematic

Quantitative Results

Results Panel

Interpretation

Compact takeaways, limitations, future work, references, contact details, and approved QR/logo assets.
