Research Question

State the core scientific or engineering question in one readable sentence.

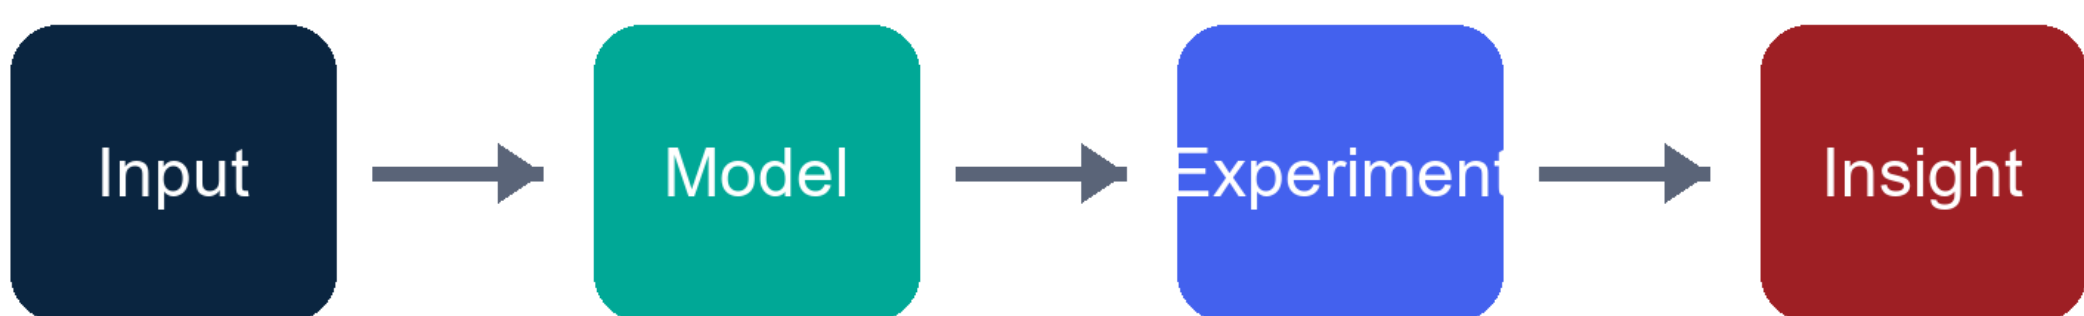

1. Motivation and Goal

Motivation, gap, hypothesis, and contribution bullets.

2. Theory and Method

Formula space: $y = f(x; \theta)$, definitions, algorithm summary, and method diagram.

Workflow Flowchart

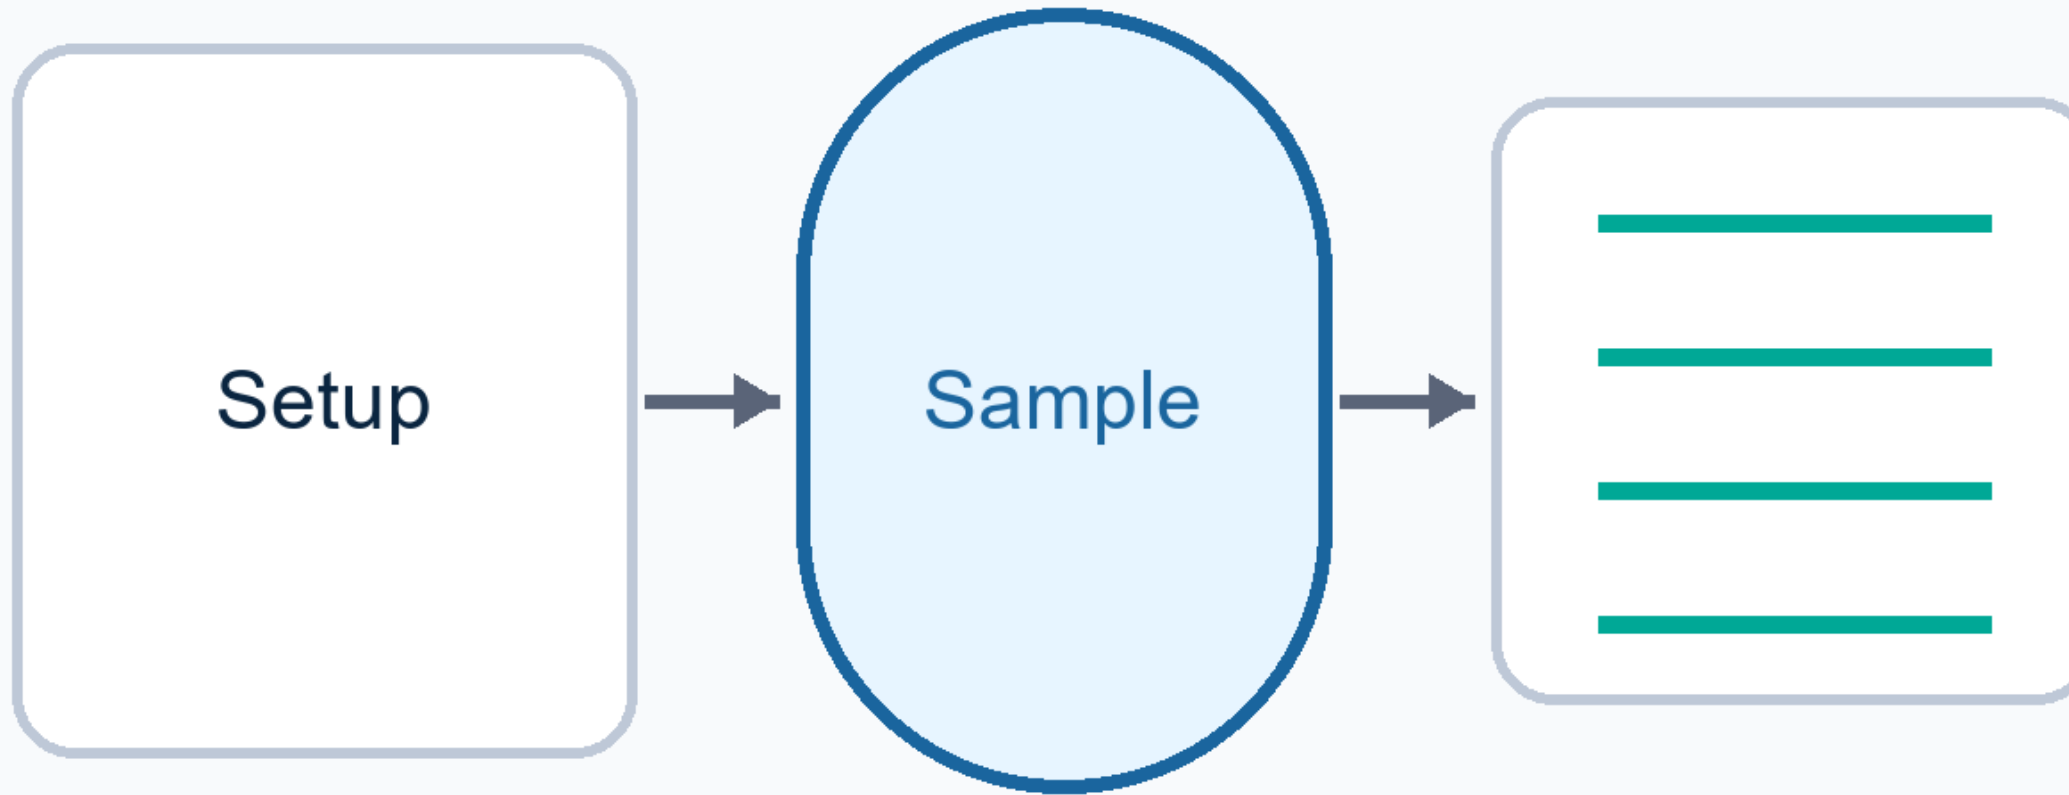

Reserved visual panel for pipeline, algorithm, or system architecture

Takeaway

Summarize the main result and why it matters for the target audience.

3. Experimental Pipeline

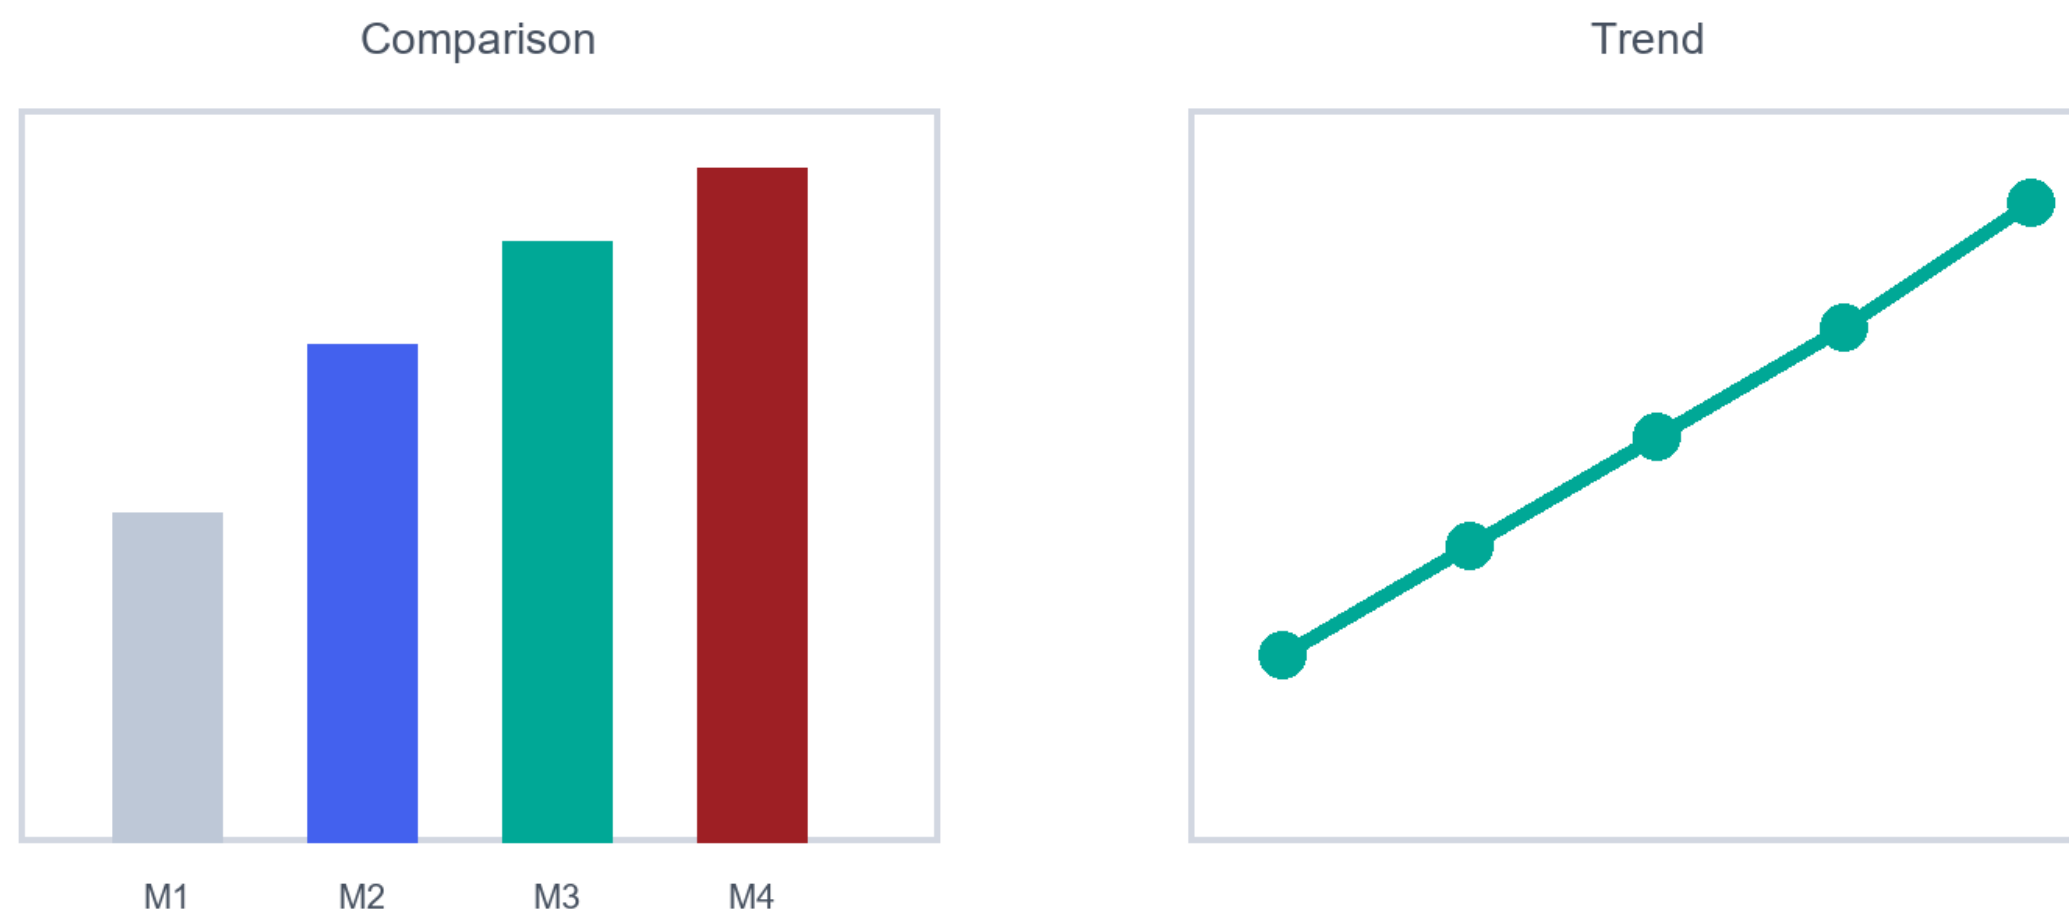

Experimental Schematic

Pipeline caption and controls.

4. Results and Interpretation

Results Panel

Key interpretation, limitations, references, and contact.
