Dense three-column conference layout
Author Names — Institution / Department

Motivation

Dense background and challenge analysis in compact bullets.

- ▶ Problem context and target gap.
- ▶ Constraints, data, or application setting.
- ▶ Main hypothesis and contribution.

Main Ideas

Core idea one, core idea two, and core idea three. Reserve space for a compact conceptual diagram if needed.

Theory

Formula: $y = f(x; \theta)$, objective function, symbol definitions, and measurement assumptions.

Proposed Method

Workflow Flowchart

Reserved visual panel for pipeline, algorithm, or system architecture

Fig. 1: Framework workflow outline.

Method summary, algorithm steps, and implementation notes approved for the poster.

Experimental Setup

Datasets, controls, baselines, metrics, equipment, and reproducibility details.

Experimental Results

Results Panel

Comparison

Trend

Method	M1	M2	M3
Baseline	-	-	-
Ours	-	-	-

Ablation and Analysis

Compact ablation chart, failure cases, uncertainty, limitations, and interpretation.

Conclusion

One-sentence takeaway, future work, references, acknowledgements, and contact/QR information.
